Allowable Subject Matter

1. Claims 3, 6-8, 11 and 14-20 are allowed.

The following is an examiner's statement of reasons for allowance: for claims 3 2. and 11, the prior art does not teach a junction device and a junction method for joining a workpiece made of a plurality of plate materials superimposed in their thickness directions at points, the method utilizing a junction tool configured by first and second tools wherein the first tool has a pin protruding from a distal end surface of the first tool along a junction axis and the second tool comprising a recess depressed at a distal end surface along the junction axis, and an annular convex portion formed at the distal end surface of the second tool so as to surround the recess, these in combination with the rest of the limitations in the claims. For claims 6 and 14, the prior art does not teach a junction device and a junction method for joining a workpiece made of a plurality of plate materials superimposed in their thickness directions at points, the method utilizing a junction tool configured by first and second tools wherein the first tool has a pin protruding from a distal end surface of the first tool along a junction axis, an annular concave groove formed at the distal end so as to surround the pin, and the second tool comprising a recess depressed at a distal end surface along the junction axis, and an annular convex portion formed at the distal end surface of the second tool so as to surround the recess, these in combination with the rest of the limitations in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
